Dry lubrication

From aluminium to titanium: Sustainable machining

Tool manufacturer HAM uses Knoll's innovative Aerosol Master 4000 ATS minimum quantity lubrication system to achieve high-quality machining results. The ultra-fine air-oil mixture provides cooling for materials ranging from aluminium to titanium while significantly reducing costs. [Read more](#)

Inovtools at AMB 2026

Five new tool solutions for increased productivity

Rising demands on machining productivity, process reliability and cost efficiency are shaping Inovtools' AMB 2026 presence. The German tool manufacturer will show five new solutions for drilling, milling and reaming, aimed at helping users machine challenging materials more efficiently and future-proof their production. [Read more](#)
